

**Ristosorb® is an innovative all-rounder
that absorbs oils, chemicals, paint, varnish and acids.**

- Made from 100% organic and ecological materials
- 100% environmentally friendly, natural, safe and non-poisonous/toxic
- Can be used anytime, anywhere - even at ground level on a windy day
- Easy to use - no special equipment or training required
- Water-resistant (hydrophobic) - can therefore be used on wet ground / in rain, making it highly superior to traditional oil absorbers.
- Even small amounts of Ristosorb® can be used to absorb huge quantities of oil, chemicals, paint and acids, therefore making it a very economical product.
- It floats - therefore opening up widespread possibilities for use both on water and land - a multi-purpose product
- Very quick reaction within 1-2 seconds meaning a significant reduction of possible dangers to a minimum amount of time.
- Simply sweep up using a brush or a sweeping machine / or lift out of the water using a filter.
- Ristosorb® does not release the absorbed liquid
- Ristosorb® holds on to the absorbed medium so efficiently that the cleaning equipment also stays clean - even very oily tools can be cleaned in seconds
- Ristosorb® suppresses odours and reduces the risks posed by flammable liquids almost completely
- No disposal problems - Can be burned with almost no residue remaining (heating value 20,000 kJ/kg).
- When combined with hydrocarbons (oil) this value can be greatly exceeded.
 - Disposal procedure is not additionally harmful to the environment.
 - Unbeatable disposal costs due to its lightweight formula.
 - Ristosorb® absorbs oils (hydrocarbons) even after they have seeped into the ground.
 - Ristosorb® is a natural product and can therefore be disposed of at the waste disposal site like household waste along with all other non-hazardous material.
 - *This depends on the form of the contaminated material, local regulations must be adhered to.
- Its significantly lightweight absorption capacity (density approx. 120 g per litre) means:
 - It is easy to store
 - little storage space is required
 - low disposal costs
 - comfortable to use
- Unlimited shelf-life
- One bag of Ristosorb® contains 50 litres, weighs approximately 7kg and can absorb up to 30 litres of fluid, depending on requirements.
- Ristosorb® has been approved for Type I, Type II, Type III R (water, ground, trade, industry, traffic area).

**Ristosorb® has many unique selling points –
it is a cheap and completely organic quality product.
-Made in Germany-**

From nature to nature

We only use products produced on German soil, which respect the German eco-restoration programme. The area is then restored to its natural state, ensuring ecological balance.

Absorbable materials

Acetone	Ethanol	Nitrobenzene
Acetonitrile	Ethyl Benzene	Pentachlorophenol
Amyl Acetate	Ethylene glycol	Pentane
Benzene	Glycerine	Plant oils
Bio-Diesel	Heptane	Phenol
Bioethanol	Hexane	Propanol
Butanol	Hexachlorbenzene	Cutting fluids
Petrol	Hexachlorbutadiene	Jet engine fuels
2-Butanone	Hexachlorethane	Styrene
Bromdichlormethane	Isobutanol	Tetrachlorethane
Bromoform	Isoprene	Tetrachlorethylene
Carbon Disulfide	Isopropanol	Tetrahydrofuran
Carbon Tetrachloride	Kerosene	Toluidine
Chloroform	Methanol	Trichlorethylene
Chlormethane	Methylene	Trichlorophenol
Chlorbenzol	Methyl ethyl keton	Vinyl acetate
Cyclohexane	Methyl phenol	Vinylchloride
Dichloroethane	Engine oils	Xylene
Dichlorethan	Naphthalene	Xylidine
Diesel fuels	2-Nitroaniline	Xylenol
