

Many absorption products are difficult to use and have low capacity when dealing with oil, chemical, paint or acid leakages. Furthermore, their heavy weight makes them very expensive to dispose of.

**Put an end to spills
with Ristosorb!**

Ristosorb®

**The innovative all-rounder
that can be used in water and on the ground.**

**One bag of Ristosorb® contains 50 litres, weighs approximately 7kg
and can absorb up to 30 litres of fluid, depending on requirements.**

Use on floors

Pour Ristosorb® on the oil leakage - it will absorb completely in just a few seconds

Sweep up - and you're finished. Even cracks and joints are cleaned in the process.

Small amounts of Ristosorb® absorb large quantities of oil. You are left with a virtually oil-free surface. For any remaining traces of oil, repeat the process using a small amount of Ristosorb®. Even the cleaning equipment will stay clean.

...leaking machines and engines

...simple, effective and cheap to use.

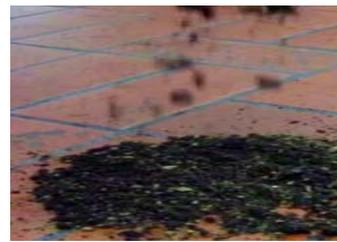

simply wrap Ristosorb® in a cloth or paper cloth, leave to absorb and then change.

Use in and on water

Pour Ristosorb® on the floating oil and lift out - the water is just as clean as it was before.

The powdery substance neither sticks nor smears, and it can be simply disposed of.

interacts immediately with oil - even in waves.

ARPZ GmbH * Distributor worldwide for Ristosorb®

Overall benefits:

- Made from 100% organic and ecological materials
- 100% environmentally friendly, natural, safe and non-poisonous
- Can be used anytime, anywhere - even at ground level on a windy day
- Water-resistant (hydrophobic) - can therefore be used on wet ground / in rain making it highly superior to traditional oil absorbers.
- Even small amounts of Ristosorb® can be used to absorb huge quantities of oil, chemicals, paint, acids, therefore making it a very economical product.
- It floats - therefore opening up widespread possibilities for use both on water and land
- Very quick reaction within 1-2 seconds meaning a significant reduction of possible dangers to a minimum amount of time.
- Simply sweep up using a brush or a sweeping machine
- Ristosorb® does not release the absorbed liquid
- Ristosorb® holds on to the absorbed medium so efficiently that the cleaning equipment also stays clean - even very oily tools can be cleaned in seconds
- Ristosorb® suppresses odours and reduces the risks posed by flammable liquids almost completely
- No disposal problems - Can be burned with almost no residue remaining (heating value 20,000 kJ/kg). When combined with hydrocarbons (oil) this value can be greatly exceeded.
 - Unbeatable disposal costs due to its lightweight formula.
 - Ristosorb® absorbs oils (hydrocarbons) even after they have seeped into the ground.
 - Ristosorb® is a natural product and can therefore be disposed of at the waste disposal site like household waste along with all other non-hazardous material*.

*This depends on the form of the contaminated material, local regulations must be adhered to.

Ristosorb® absorbs:

Petrol, Bio-diesel, diesel, kerosene, engine oil, crude oil, mineral oil, lubricants, plant oils, paints, varnish, formaldehyde, sulphuric acid, octane, synthetic oil, organic solvents and hydrocarbons (PCB) amongst many others..

before

after

The absorption of liquids has become a simple and environmentally friendly process - that is a guarantee!

From nature to nature

We only use products produced on German soil, which respect the German eco-restoration programme. The area is then restored to its natural state, ensuring ecological balance

Reap the benefits from Ristosorb® in future.
